

```

class Main {
    public static void main(String[] args) {
        * Son s = new Son(5);
        * Father f = new Father("Hommer");
        * Grandfather g = new Grandfather();
        * System.out.println("s.id = " + s.id);
    }
}

```

s

id	5
name	Father
avg	0.0

b

name	Hommer
avg	0.0

g

avg	0.0
-----	-----

Terminal

```

* Ok
  Father almost
  Son done!
* ok
  Hommer almost
* Grandfather done
* S.id = 5

```
